

## **PART 1: TOPICAL AGENTS**

### **Chapter 1**

Topical treatments for acne and rosacea: clindamycin, erythromycin, metronidazole, benzoyl peroxide

### **Chapter 2**

Antibiotics for infection: fusidic acid, mupirocin, neomycin, polymyxin B, silver sulfadiazine

### **Chapter 3**

Antifungal agents: terbinafine, imidazoles

### **Chapter 4**

Antiperspirants: aluminium chloride hexahydrate, glycopyrronium

### **Chapter 5**

Aciclovir

### **Chapter 6**

Anti-parasitics: topical and oral scabicides and headlice therapies

### **Chapter 7**

Antiseptics: chlorhexidine gluconate, benzalkonium chloride, bleach baths, iodine, potassium permanganate, acetic acid, hydrogen peroxide

### **Chapter 8**

Corticosteroids in children

### **Chapter 9**

Corticosteroids in adults

### **Chapter 10**

Anti-actinic therapies: 5-Fluorouracil, diclofenac, others

### **Chapter 11**

Depigmenting agents: retinoids, hydroquinone, azelaic acid

### **Chapter 12**

Hair removal: eflornithine, IPL

### **Chapter 13**

Dithranol

### **Chapter 14**

Emollients

### **Chapter 15**

Imiquimod

### **Chapter 16**

Immunomodulators: tacrolimus, pimecrolimus

### **Chapter 17**

Minoxidil

### **Chapter 18**

Keratolytics: salicylic acid, urea cream, propylene glycol

### **Chapter 19**

Retinoids

### **Chapter 20**

Sensitizing agents: diphenycprone

### **Chapter 21**

Sunscreens

### **Chapter 22**

Tars

### **Chapter 23**

Vitamin D analogs

## **PART 2: PROCEDURES**

**Chapter 24**

Botulinum toxin

**Chapter 25**

Injected triamcinolone

**Chapter 26**

Iontophoresis

**Chapter 27**

IPL and lasers

**Chapter 28**

Liquid nitrogen

**Chapter 29**

Phototherapy

**Chapter 30**

Curettage

**Chapter 31**

Biopsies

**Chapter 32**

Simple excisions

**Chapter 33**

Mohs surgery basics

**Chapter 34**

Managing surgical complications

**Chapter 35**

PDT

**Chapter 36**

Bandages: PB7s, compression, dressings, leg ulcers etc.

**PART 3: ORAL DRUGS****Chapter 37**

Acitretin

**Chapter 38**

Alitretinoin

**Chapter 39**

Isotretinoin

**Chapter 40**

Anti-viral drugs: aciclovir, famciclovir, ganciclovir, valaciclovir

**Chapter 41**

Anti-androgens: cyproterone acetate, spironolactone, finasteride

**Chapter 42**

Antibiotics for acne: tetracyclines, erythromycin, trimethoprim

**Chapter 43**

Antibiotics for infection

**Chapter 44**

Anti-fungal drugs: terbinafine, griseofulvin, itraconazole, fluconazole, nystatin

**Chapter 45**

Antihistamines and related: H1 antagonists, sodium cromoglycate, leukotriene receptor antagonists

**Chapter 46**

Antiparasitic agents: ivermectin, albendazole, mebendazole

**Chapter 47**

Azathioprine

**Chapter 48**

Mycophenolate mofetil

**Chapter 49**

Biological therapies for psoriasis: infliximab, adalimumab, etanercept, ustekinumab, secukinumab

**Chapter 50**

Biologics: ipilimumab, vemurafenib, vismodegib

**Chapter 51**

Cyclosporine

**Chapter 52**

Colchicine

**Chapter 53**

Cyclophosphamide

**Chapter 54**

Dapsone and sulfapyridine

**Chapter 55**

Fumaric acid esters (fumarates)

**Chapter 56**

Glucocorticoids

**Chapter 57**

Hydroxycarbamide

**Chapter 58**

Hydroxychloroquine and mepacrine

**Chapter 59**

Intravenous immunoglobulin

**Chapter 60**

Methotrexate

**Chapter 61**

Thalidomide

**Chapter 62**

Biologics: rituximab
