

# CONTENTS

---

<b>1. Principles and Technology</b>	<b>1</b>
<i>David Huang, Yali Jia</i>	
• Optical Coherence Tomographic Angiography Methods	1
• Split-Spectrum Amplitude-Decorrelation Angiography	1
• Optovue Angiovue Technology	1
• Clinical Applications of OCTA Technology	2
<b>2. Terminology</b>	<b>3</b>
<i>David Huang, Yali Jia</i>	
• Structural Optical Coherence Tomography	3
• Quantification of Neovascularization	6
<b>3. Practical Problems of OCT Angiography: Tips and Tricks</b>	<b>8</b>
<i>Marco Rispoli</i>	
• Practical Tips for Everyday OCTA Examination	8
• Mistakes to be Avoided	9
• How to Fix Some Practical Problems: Concepts and Rules	12
<b>4. Artifacts in OCT Angiography</b>	<b>18</b>
<i>Marco Rispoli</i>	
• Movement Artifacts	18
• Flow Projection Artifacts	21
• Segmentation Errors	21
• False-positive Flow	24
• False-negative Flow	24
• Low-intensity Imaging	26
• Nonvascular Flow Signal	26
<b>5. OCT Angiography of Normal Retinal Vascular Structure</b>	<b>29</b>
<i>Maria Cristina Savastano, Bruno Lumbroso</i>	
• Retinal Vascular Networks	31
<b>6. OCT Angiography Quantitative Assessment</b>	<b>36</b>
<i>Marco Rispoli</i>	
• Flow Area	37
• Nonflow Area, Vascular Dropout Area	37
• Flow-density Map	38

• Flow Speed	41	
• Other Optical Coherence Tomography Angiography Quantitative Parameters	41	
<b>7. Choroidal Neovascularization in Age-related Macular Degeneration (Exudative and Nonexudative Choroidal Neovascularization)</b>		<b>42</b>
<i>Bruno Lumbroso, Marco Rispoli</i>		
• Optical Coherence Tomography Angiography in Everyday Clinical Use for Choroidal Neovascularization	42	
• Classification	42	
• Choroidal Neovascularization Evaluation	45	
• Exudative Choroidal Neovascularization: Type 1, Type 2, Type 3 and Type 4 (Mixed) Choroidal Neovascularization	45	
• Exudative Choroidal Neovascularization Evolution	61	
• Nonexudative Choroidal Neovascularization	65	
• Choroidal Neovascularization Management	72	
<b>8. Exudative Choroidal Neovascularization Monitoring after Treatment</b>		<b>75</b>
<i>Bruno Lumbroso, Marco Rispoli</i>		
• Immediate Evolution after Treatment	75	
• Maturation	81	
• Recurrences	83	
• Vascularized Fibrous Scar	85	
• Management of Choroidal Neovascularization	90	
<b>9. Optical Coherence Tomography Angiography in Dry Age-related Macular Degeneration</b>		<b>92</b>
<i>Maria Vittoria Cicinelli, Eric Souied, Francesco Bandello, Giuseppe Querques</i>		
• Drusen	93	
• Reticular Pseudodrusen	95	
• Geographic Atrophy	95	
• Prognostic Implications	97	
<b>10. Choroidal Neovascularization Activity Features</b>		<b>101</b>
<i>Bruno Lumbroso, Marco Rispoli</i>		
• Exudative Choroidal Neovascularization: Active or Quiescent?	101	
• Nonexudative Choroidal Neovascularization: Active or Quiescent?	110	
<b>11. OCTA Features in Polypoidal Vasculopathy</b>		<b>113</b>
<i>Luca Di Antonio, Leonardo Mastropasqua</i>		

- 12. Choroidal Neovascularization** **123**  
**Other Etiologies: Myopia**  
*Bruno Lumbroso, Marco Rispoli*
- Neovascular Membranes in Myopia 123
- 13. OCT Angiography Other CNV not from AMD** **127**  
*Maddalena Quaranta-El Maftouhi, Adil El Maftouhi*
- Type 1 Choroidal Neovascularization in Chronic Central Serous Chorioretinopathy 127
  - Polypoidal Choroidal Vasculopathy 128
  - Angioid Streaks and Choroidal Neovascularization 132
  - Choroidal Neovascularization in Multifocal Choroiditis 136
  - Pseudovitelliform Reticular Dystrophy and Choroidal Neovascularization 138
- 14. Diabetic Retinopathy and Optical Coherence Tomography Angiography** **141**  
*Maria Cristina Savastano, Bruno Lumbroso*
- Optical Coherence Tomography Angiography in Everyday Clinical Management of Nonproliferative Diabetic Retinopathy and Proliferative Diabetic Retinopathy 141
  - Structural Optical Coherence Tomography and *En Face* Optical Coherence Tomography 144
  - Optical Coherence Tomography Angiography 144
  - Mild and Severe Nonproliferative Diabetic Retinopathy 147
  - Diabetic Diffuse and Cystoid Macular Edema 153
  - Quantitative Analysis Applications 154
  - Management of Early (Background) Nonproliferative Diabetic Retinopathy 156
  - Management of Diabetic Macular Edema in Nonproliferative Diabetic Retinopathy 156
  - Preretinal or Prepapillary Neovascularization in Proliferative Diabetic Retinopathy 159
- 15. Branch and Central Vein Occlusions** **164**  
*Marco Rispoli*
- Optical Coherence Tomography Angiography in Everyday Clinical Management of Central Retinal Vein Occlusion and Branch Vein Occlusion 164
  - Fluorescein Angiography 165
  - Structural Optical Coherence Tomography Features 165
  - Optical Coherence Tomography Angiography 165
  - Branch Retinal Vein Occlusion Quantitative Assessment 170
  - Central Retinal Vein Occlusion 177

• Management of Retinal Vein Occlusions	180
• Retinal Artery Occlusions	183
<b>16. Other OCT Angiography Clinical Applications— Miscellaneous Retinal Disorders</b>	<b>189</b>
<i>Bruno Lumbroso, Marco Rispoli</i>	
• Von Hippel-Lindau	189
• Coats' Disease	191
• Osteoma	191
• Hamartoma	192
• Radiation Retinopathy	192
<b>17. Fluorescein and Optical Coherence Tomography Angiography: A Progressive Transition</b>	<b>197</b>
<i>Bruno Lumbroso, Marco Rispoli</i>	
• Fluorescein Angiography	198
• Optical Coherence Tomography Angiography	199
• General Comments	200
• Nonperfused Areas in Fluorescein Angiography and in Optical Coherence Tomography Angiography	204
• Choroidal Neovascularization	205
• Conclusions: Features Added by Optical Coherence Tomography Angiography on Traditional Fluorescein Angiography	205
<b>18. How to Write an Optical Coherence Tomography Angiography Report</b>	<b>207</b>
<i>Bruno Lumbroso, Marco Rispoli</i>	
• Optical Coherence Tomography Angiography Report Sheet	208
• Optical Coherence Tomography Angiography Screenshots and Scans Attached to Report	209
• Optical Coherence Tomography Angiography Clinical Written Report	210
• Comparison and Follow-up	215
